'Delivering Successful Projects in a Changing Environment'

Live Demo and Presentation by
Raja Seevan
Founder Trustee
rajaseevan@indiancst.in or rajaseevan@gmail.com

Bringing Efficiency, Transparency and Accountability into Publicly funded projects/portfolios using GPMS Cloud

www.indiancst.in

www.gpmswiki.org

Indian CST is a public charitable Trust with a mission to work towards realization of a national vision set out in Article 51A (j) of the Indian Constitution regarding the Fundamental Duty of Indian Citizens i.e.

"to strive towards excellence in all spheres of individual and collective activity so that the nation constantly rises to higher levels of endeavor and achievement."

Expertise's available related to the project available at Indian CST

Providing Technology, Project Coordination, Project Management and Monitoring relevant to the project

Providing GPMS secured cloud setup, customization and maintenance

Providing survey forms, with clear demarcation of field questions and questions to be filled up in the field

Providing completed surveys to be uploaded into GPMS

Suggesting mobile devices, Tablet PC and GPRS- enabled sim cards for each mobile and end-to-end solution for the survey system

Providing Data Center Infrastructure and Bandwidth as required for the project

Overall administration of the project online

Setting up, customizing and operating GPMS-REMS for the project

Report generation for automatic statistical analysis

Setting up & operating online help desk to provide field support

Data backup and recovery will be updated as mentioned by Client

Providing various Databases Integration into GPMS platform

Providing customized mobile survey software

Providing Backend software for mobile data processing, field database update

Providing Mobile system tech online support

Providing Data backup & recovery for mobile data and other data collected online

What does Indian CST do

- It brings people together and works for their empowerment.
- It helps citizens to share their problems, pool talents and find solutions.
- It strives to provide relief for the poor, the distressed, the underprivileged.
- It encourages good governance and transparency and promotes efficiency and accountability.
- It works for cost effective solutions in all spheres of life.

Indian CST GPMS Platform integrates various Tools & Techniques for Data Collection, Analysis with Correlations for Decision Making
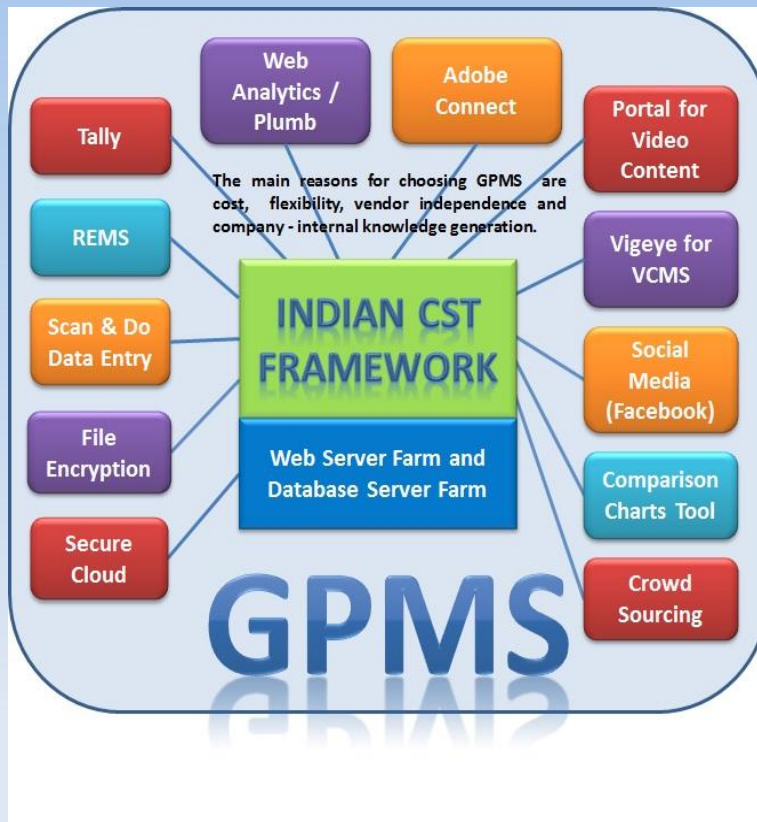

CLOUD COMPUTING
Government Performance Monitoring Solution

GPMS facilities enterprises whose requirements are not covered by standard software / platforms for real time monitoring

Integrated GPMS Cloud Computing Solutions as Services

GPMS for Project, Program and Portfolio Management e-tool that brings together global best practices to suit local requirements and skill sets with Metrics Management for Anyone, Any time and Any where to access & update information online

GPMS-Online Application Forms with Multiple Banks Payment Gate way System Integration for all 28 State Govt. Ministry Departments for data collection, Investment analyses for decision making across Districts in the State

GPMS-Mapping of Knowledge areas on GPMS Cloud for Cost comparison studies for that facilitates in arranging infrastructure like Land, Water and Power etc. similar works within and across organizations using Crowdsourcing model

GPMS-Investor Relationship Management , Monitoring Solution to enhance efficiency, transparency and governance in delivery through Single Window Clearance System of approved projects in the line Departments/agencies.

GPMS-E-File Document Management System Integrated with Digital Signature & Data Security that facilitates conversion of unstructured data to structured data that can facilitate necessary clearances / approvals from the Government Departments / Agencies online

GPMS- Online Survey System Single view of stakeholders and public inputs integration with multi-media technology (GPS enabled photographs, videos, etc.) evidence based feed backs for Government Departments / Agencies Remedial Actions

GPMS-Financial Payments / Receipts Management Monitoring System Integrated with Tally for utilization of public money by government and its various bodies that Increases transparency, accountability and efficiency in Government Departments

GPMS Communication Management System -Email, SMS, Mobile Task, Compliant System Integration with Geo Tagging for disseminating information about actual situation on work ground. by allowing them to comment and upload documents to the website for viewing or response by others.
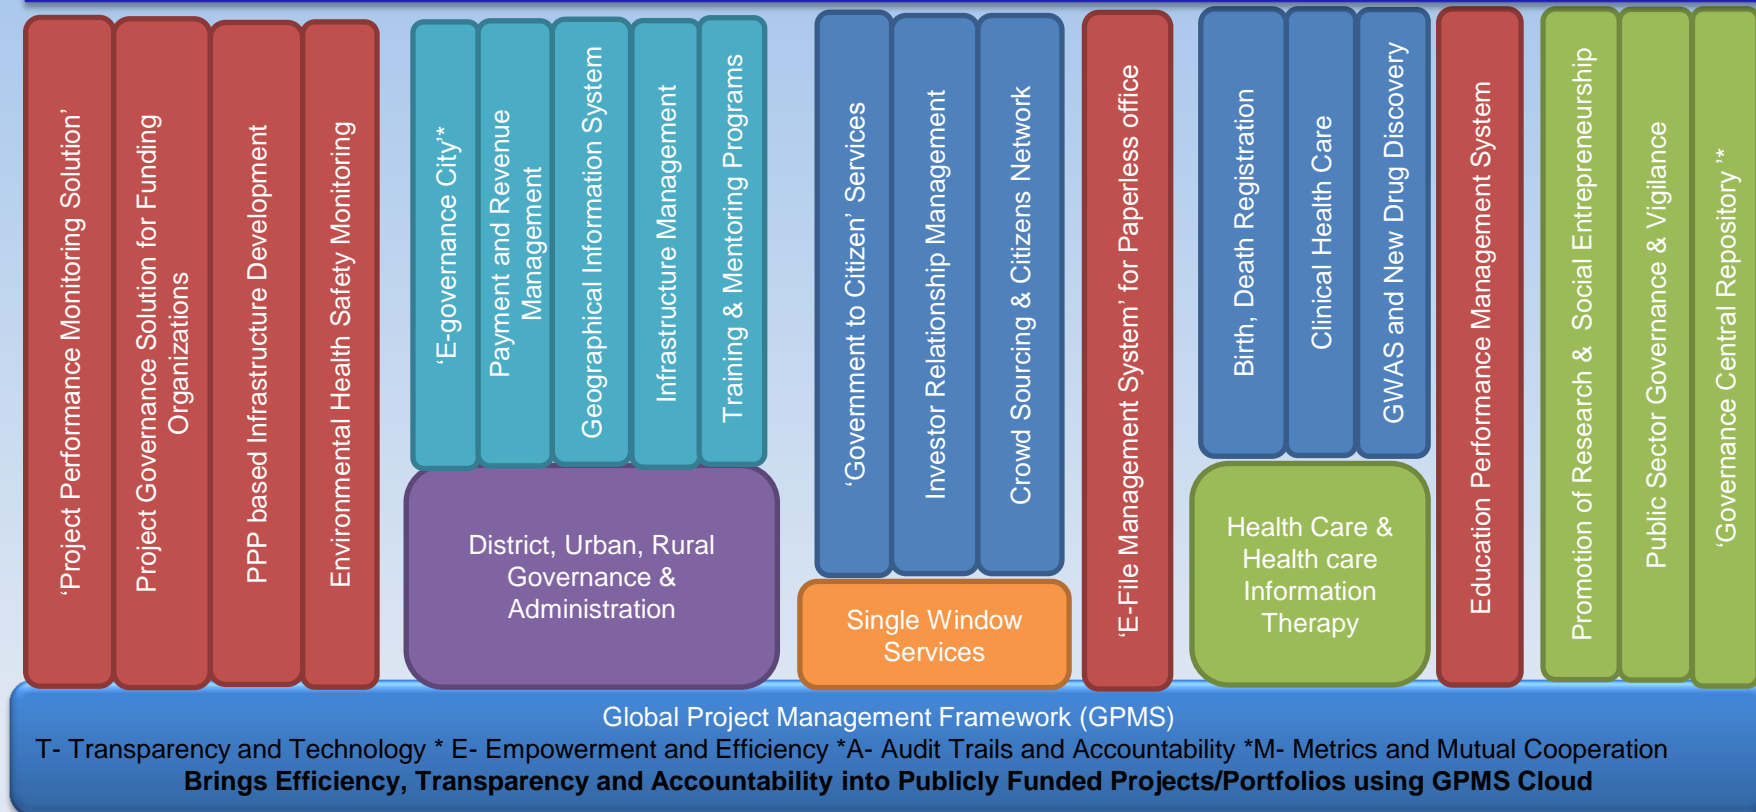

GPMS- Beneficiary, Investor, MSME, Companies, etc. Verification System integrating ADHAAR UID system

Availability of information Public page integrated with Face Book in public domain enhances the transparency considerations

Integrated GPMS e-Governance Cloud Computing Solutions that gets correlated constantly to provide reliable information for actionable intelligence

Project Integration Management-Project Scope Management-Project Time Management-Project Cost Management-Project Quality Management-Project Human Resource Management-Project Communications Management- Project Risk Management- Project Procurement Management

- 'Project Performance Monitoring Solution'
- Project Governance Solution for Funding Organizations
- PPP based Infrastructure Development
- Environmental Health Safety Monitoring

- 'E-governance City'*
- Payment and Revenue Management
- Geographical Information System
- Infrastructure Management
- Training & Mentoring Programs

District, Urban, Rural Governance & Administration

- 'Government to Citizen' Services
- Investor Relationship Management
- Crowd Sourcing & Citizens Network

Single Window Services

- 'E-File Management System' for Paperless office

- Birth, Death Registration
- Clinical Health Care
- GWAS and New Drug Discovery

Health Care & Health care Information Therapy

- Education Performance Management System

- Promotion of Research & Social Entrepreneurship
- Public Sector Governance & Vigilance
- 'Governance Central Repository '*

Global Project Management Framework (GPMS)
T- Transparency and Technology * E- Empowerment and Efficiency *A- Audit Trails and Accountability *M- Metrics and Mutual Cooperation
Brings Efficiency, Transparency and Accountability into Publicly Funded Projects/Portfolios using GPMS Cloud

National Data Sharing and Accessibility Policy-2012 (NDSAP-2012)
Department of Science & Technology Ministry of science & Technology Government of India enabled in GPMS....The National Data Sharing and Accessibility Policy will apply to all data and information created, generated, collected and archived using public funds provided by Government of India directly or through authorized agencies by various Ministries / Departments /Organizations / Agencies and Autonomous bodies.

Integrated with Real time Monitoring System

GPMS integrated with Real time Monitoring System and Mobile Task Management System

GPMS Integrated with Geographical Information System

GPMS-FMS-IRMS-EHS-Health-E-File Management-REMS-CMS-GWAS-Integrated with GIS
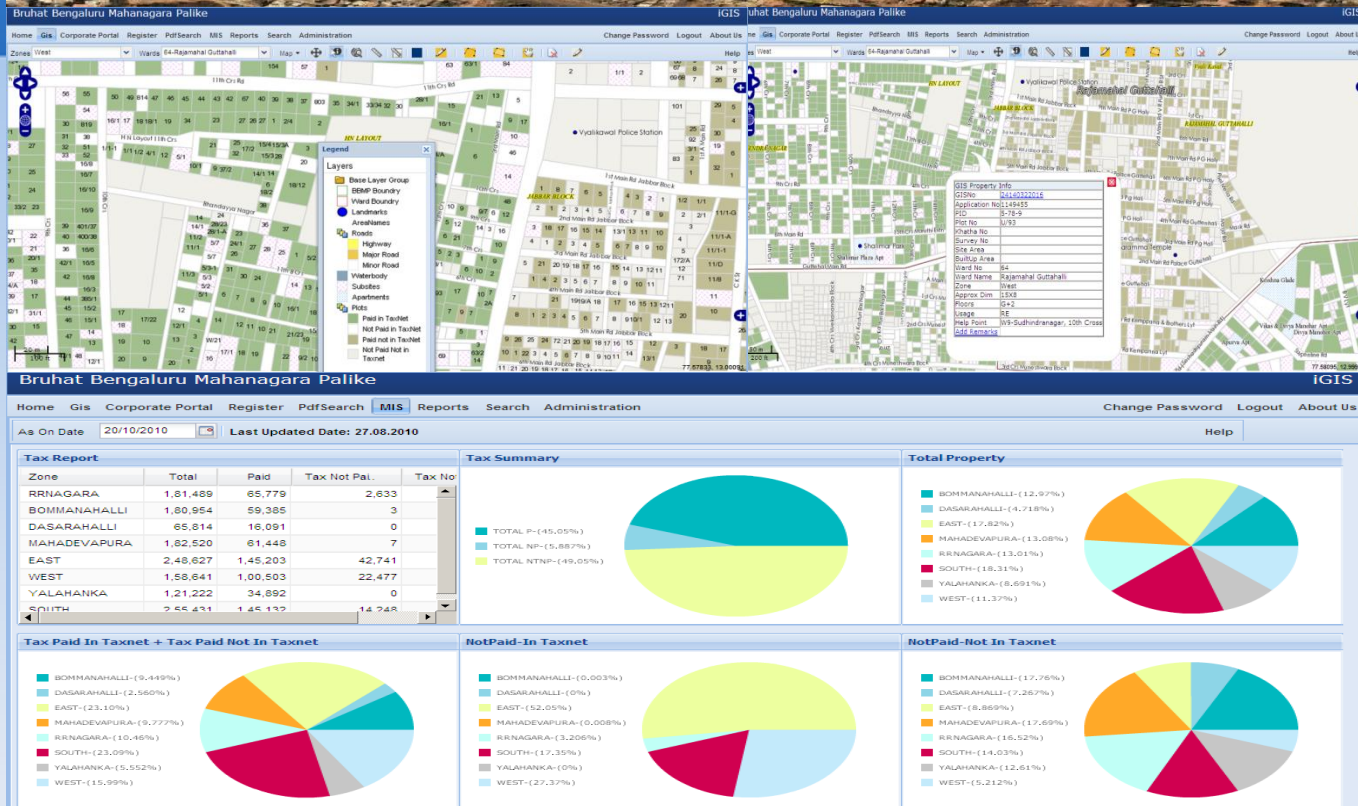

Transparency and accountability through field data capture
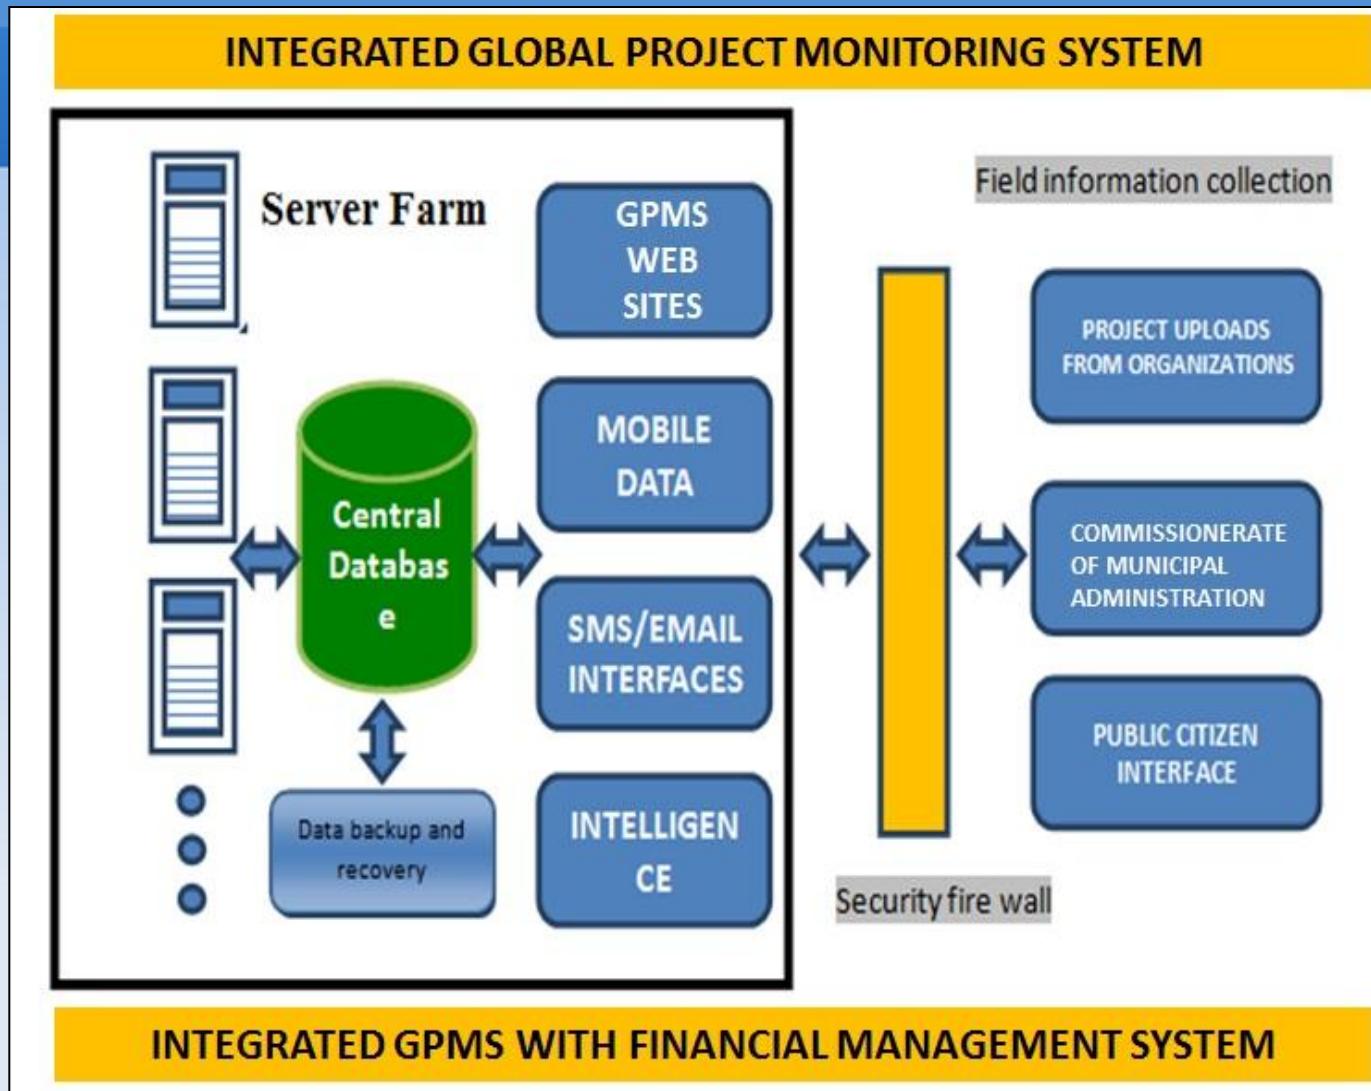

Real time communication and information sharing

INTEGRATED GPMS-FMS MONITORING SYSTEM

Initial project entry in GPMS

Automated checks for correctness & completeness

Review of the project data by CMA

Is it complete ?

Data Analysis for CMA Compliance

Intelligence Report

SINGLE WINDOW UNIFIED COMMUNICATIONS SYSTEM FOR GOVERNANCE DELIVERED
Anytime, Anywhere, Any devise

Integrated GPMS with FMS-IRMS-EHS-REMS-Task Management

Integrated GPMS constantly evolves and processes incoming information which in turn correlates constantly to provide reliable information for actionable intelligence

GPMS is Available as a Pay-by-Use Service from a Secured Cloud Computing for all

Better information
Increases Transparency and Accountability

Better delivery of services
Better monitoring
Improve efficiency
Reduces cost\

Using Technology to Bring Efficiency, Transparency and Accountability

GPMS Cloud Nine Knowledge Areas

1. Project Integration Management
2. Project Scope Management
3. Project Time Management
4. Project Cost Management
5. Project Quality Management
6. Project Human Resource Management
7. Project Communications Management
8. Project Risk Management
9. Project Procurement Management

Bringing Efficiency, Transparency and Accountability into Publicly Funded Projects/Portfolios using GPMS Cloud

Enables constant improvement in e-governance services through continuous public feedback.

Indian CST: GPMS – Case Studies

1. **E-Governance**- BBMP 92000+ Projects, Rs.14000 cr.
2. BBMP Healthcare - Birth and Death monitoring- 1800 hospitals integrated, 6 lakhs data information updated
3. **Real time Revenue Monitoring of General Receipts, Payments** 320+ R-codes, 936 bank branches, all 450 BBMP department offices connected **total of Re. 6,400 crores transactions as on 31-7-2013**
4. **Valsad District** , Farida Taluk 207 + Projects of 13th Finance
5. **NHAI**- 217 National roads and projects
6. **Education- Bangalore University-** 24 lakhs Students, 24 Lakhs Answer scripts online, Schools, Colleges too integrated
7. **Citizen Healthcare** – 1,02,000 Oncology patients medical records data brought online
8. **Beneficiary Monitoring-** IAY Bihar 30 Lakhs BPL updated
9. **Ministry of Minorities Schemes Monitoring** – 55,000 + 2010/11 All India Students

Indian CST: GPMS – Case Studies contd..

1. **GWAS Central India**-Sequencing of the Indian Population
2. **UK-India GWAS Central**: global data basing of gene-disease knowledge for 21st century research and healthcare
3. **Transactions Monitoring-** Income Tax department
4. **India Citizens Network** – crosses 1 cr. Registered citizens
5. **MSME's Monitoring**- 3 Lakhs and counting up to date
6. **NGO's Monitoring** – 41,000 + and counting up to date
7. **CSIR-800**- Project Management and Monitoring of 800 million beneficiaries monitoring 1800 Schemes of the Govt. of India.
8. **Vigeye GPMS**- CWG 2010 – 13,000 projects updated online, Rs. 13000 cr. 1, 50,000 User names given
9. **Team one world** – 256 Country Instances released
10. **GPMS Training Programs**. Awareness Programs/ workshops conducted for approx. 25,000 people across India
11. **GPMS-IRMS-FMS-** Karnataka Udgyog Mitra for Monitoring all projects and managing all **Rs. 7.30 lakh crores** Investments MOU's signed across the entire state under Global investors meet online

Advantages of using Cloud-Based GPMS

1. The goal is to use technology-aided tools to enable efficiency and transparency and bring about accountability in all organizations projects or services.
2. To provide total transparency in all the projects functions for the Organization.
3. Empower managers by providing them accurate ready-to-view real-time information online.
4. Provide a single-point database for all Citizen Services and matters.
5. Enable access to central repository to all citizen transaction data through cloud services.
6. Bring about constant improvement in services to the citizen through continuous public feedback.
7. Organizations can provide GPMS portal for public to register complaints, view projects, provide additional information, suggestions of their interest and update delays or inconvenience caused through this GPMS-REMS online portal.

USP of Indian CST GPMS Cloud

- Unique institution
- Anytime, anywhere any medium approach
- Affordable world class solutions
- Collaborative & inclusive growth that is measurable
- Works with Governments, Institutions & all Citizens
- Total transparency & all round productivity increase
- Scalable delivery model
- Direct/Indirect benefits for all
- Win - Win solutions
- Measured progress towards set targets (tough targets)

What is GPMS System?

- System that takes care of the complete life cycle of the projects

- The system can be used to do the pre and post analysis of projects

- View of projects within and across the organizations

- The system can be used as a Knowledge Management System

CVCMARK

- C-   Capturing data
- V-   Validating data
- C-   Checking data
- M-   Measuring data
- A-   Accountability
- R-   Reporting of data
- K-   Performance Indicators

Benefits of GPMS System
Nine Knowledge Areas

- Project Integration Management

- Project Scope Management

- Project Time Management

- Project Cost Management

- Project Quality Management

- Project Human Resource Management

- Project Communications Management

- Project Risk Management

- Project Procurement Management

In-built escalation mechanism where superiors can quickly identify non-conformances and initiate interventions leading preventive delays

GPMS with Remote monitoring process for on-going projects at multiple locations

For Determining Geographic distribution
1. of birth /death /diseases
2. of Revenues / Payments
3. of property paid / unpaid tax
4. of Govt. schemes
5. of educational Institutions
6. of Projects / Works
7. of Public Grievances / Complaints
8. of Solid Waste
9. of Building plans approvals

- Complete monitoring of projects from start to end
- Sufficient inputs for easy decision making
- Single view of stakeholders and public inputs
- Cost comparison for similar works within and across organizations
- Clarifications asked through auto generated questionnaires

Complete Monitoring of Projects

Global Project Management Solution is offered as a management tool that will introduce high end technological platforms like cloud computing and crowd sourcing.

- Pre-award to post-award

- Quality of work

- Progress(Physical and financial)

- Complaints

- Compare the different reports

- Assessment of employees, contractor

- Views of public

Comparison of Data
from Conversion of unstructured data to structured data, while maintaining their integrity

- Availability of data from different resources

  - Accounts

  - Field

  - Experts

  - Consultants/Agency

  - Execution Team

  - Historical Data

  - Public Opinion

Removing Distance from Remote Projects
Allows graphical information exchange including videos and photographs
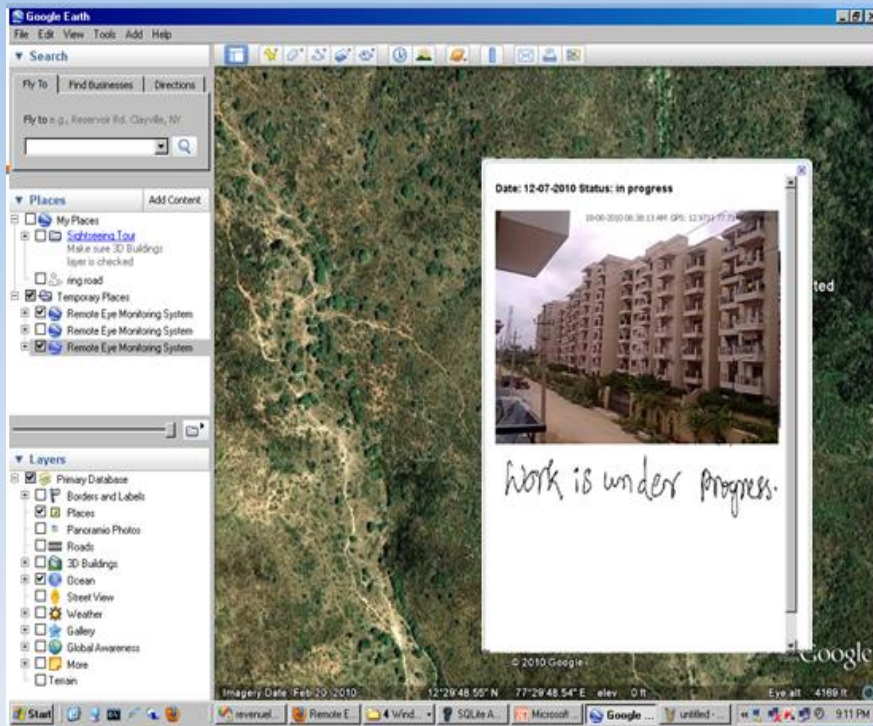

- Case Study: BBMP

- Data coming from remote locations

- Physical Monitoring

- Remote task assignment

- Feedback

- Difficulties faced in execution of projects in difficult locations
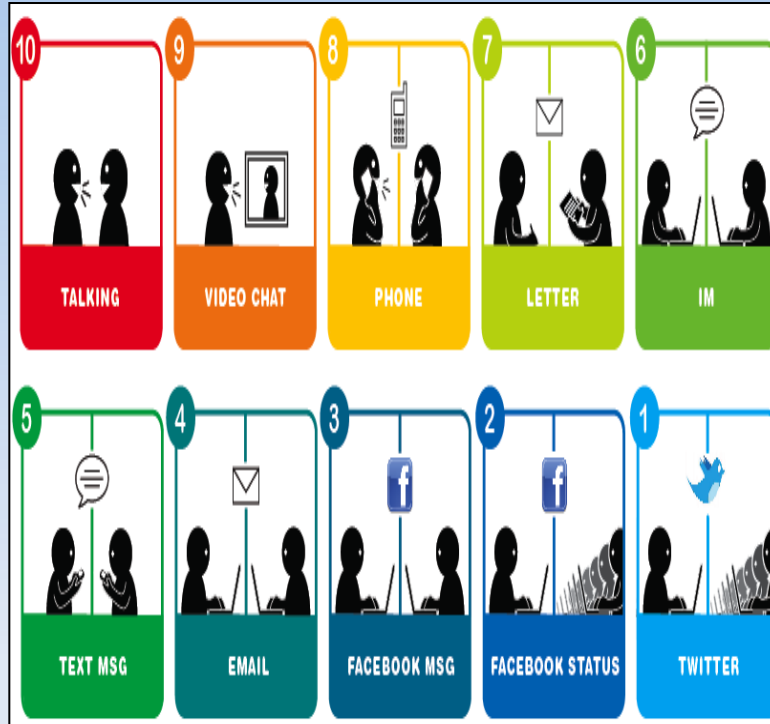

- Solution to risks in future projects

Unified Data and Information Trans-Portal for Open Governance
Accessibility from anytime, anywhere
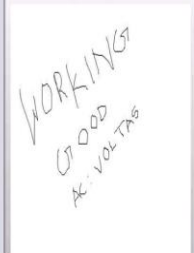

Organization Reports

- Brief History about tender practices

- Payment practices

- Tax deduction Practices

- Delicacy and necessity of the project

- Employees history about the project management

- Contractor's history

Sufficient inputs for decision on current & Future projects

- Tender procedures

- Shortcomings noticed in preparation of cost estimate and award of the work

- Reasons for delay in execution of projects

- Abnormally increases in project cost

- Discrepancies in tax deduction/payments

- Complaints against the project/employee/contractor

Clarifications asked through auto generated questionnaires

GPMS Crowd sourcing management solutions
Governance

- Different media can be used for sending questionnaires and feedback(SMS or emails, photos)

- Templates can be created for clarifications required by the management

- Frequency and reminders will be auto-generated to be decided by the management

The GPMS has two basic features

- **To collect and transmit information** from field in real time to a central server.
- Information from field will be collected using hand held devices/ mobile phones.
- **Information collected can be a photo, video, audio, note** or a survey/ inspection form.
- Information collected is to be **stamped with Geo Coordinates and time.**
- Information collected will be encrypted and **instantly transferred from the device to the centralised serve**r using network connectivity of the device.
- Information can be captured and transmitted by Field officers, inspection teams, Volunteers, NGOs etc.

- **To analyze field information**

- The information collected from the field will be analysed for various parameters designed for cost overrun, time overrun and quality checks.

- Exception reporting can be auto generated for senior officers to visualize.

- To give specific tasks to collect field information

The other Unique features of GPMS include

- **Mobile Task module** in the GPMS provides for a mobile task system, using which the Commissionerate of Municipal Administration can interact with the organization staff, the citizens and stake holders monitoring the project and the CMA office to gather first-hand information through mobile phones and directly upload the same into Integrated GPMS.

- **GIS module in GPMS** where project data can be analysed & viewed in a geographical context. The geo-stamped data coming from the mobile task system, GPMS citizen complaints from GPS-enabled mobiles, geo-stamped data from citizens and stakeholders etc. are mapped into a GIS software such as Google Earth to view & analysis it geographically.

- **SMS Communication Module** to facilitate SMS interface in seamlessly integrating into GPMS such that the Municipality engineers, CMS team can send bulk, organisation-level, project-level, team-level or individual-level communication through SMSes.

Empowering Project Management with Knowledge Management & Cloud Computing

A GPMS Cloud Computing Integrated project monitoring system with mobile task management system E-file management system, with Scan and do Data entry system, with Financial management system, Customized user management, Face book integration, QPR, Initial Scrutiny, Public Page, Dynamic MIS reports, web analytics, SMS, Mail Server, Project Vigeye, Document security encryption enabled, with Remote Eye Monitoring System, with Unified Data and Information Trans-portal for open governance, with Communications management and monitoring, public grievances monitoring with a dynamic single point dashboard representation for analyses with GIS location on map with integrated dashboard with Role based user management, with Metadata management, with Query System

So what is happening in India?

Are we any where near all this and more ?

What about Delhi? Our capital?

What about our silicon city? Bangalore – sorry Bengaluru?

Amazon

Namma Bengaluru

- *Amazon is famous for pioneering a whole new business ecosystem in its deployment of the business cloud in the form of its Amazon Web Services (AWS) in 2006,.*

- *In a report* last year, it is noted that Amazon accepted "That the number of objects stored on its S3 cloud storage service hit 449 billion in the Q2, 2011, a massive jump from the262 billion objects stored on Amazon S3 in Q4, 2010.*

- *Also, the S3 processed 290,000 requests per second at peak times, up from 200,000 at the end of 2010".*

- *PwC reports $5.9 bn global revenue for Amazon by 2014*

- Bruhat Bengalurur Mahanagarpalike (BBMP) has collected funds and processed and paid payments totalling Rs 10 billion in 2012-13

- ₹ 2,230,548,919.34 recd in Jan 2013

- In this financial year so far - Bengaluru citizens have received payments receipts from the BBMP cloud after deposting- house tax, building cess, conservancy charges and fees for birth and death registration etc etc.

- BU processed may-June 2010 semester exam papers for 200000 plus students (in atleast four papers each) and made available the answer scripts on the cloud reducing marks revaluation requests to a mere 9000 from 99000 in the previous year

Cloud for profit and governance

Come Again?

- **Amazing facts!**

- **Namma Bengaluru beats Amazon in its own game!!**

You did not know it?!

And you say you are from the Information Technology sector and most of you are from Bengaluru our own silicon city?

Yet you did not know these facts

You refuse to believe?

Come to the wards of Bengaluru, take a walk on its streets and see for yourself!!

(You can also click for a virtual tour)

www.bbmp.gov.in

Let us log in for some real time public view/news on revenue collection done today by BBMP and its officials in the Head office, Zones, Divisions, Sub-Divisions, 198 wards and 450+ Municipal offices having 936 Bank accounts for reconciliations

Social Transformation through GPMS

Global Project Management Solution is a Management Decision Support System for Leaders
